

Information on Webinar or Distance Learning Trainings Available For Operator CEUs or Potential Professional Development Hours

Water and Wastewater Operators

Montana DEQ

Please visit the operator certification website at: <http://deq.mt.gov/water/operatorcertification>. On the main page, under the [Billings Spring School Information](#) there is a [CEC Streaming Link](#). This provides access for the dual classes offered at the school. There are three days of training offered.

Under [Exam Dates and Training](#) menu, there is access to the **2020 Training Calendar**. In the back of the calendar there is correspondence training listed from MSU-Northern. There is also access to info for **Online Training & CEC Opportunities and Approved Training Providers**.

MTDEQ has approved AWWA and WEF online webinars for Continuing Education Credits (CECs) for water and wastewater operators. Some of the webinars are free and others have a member and non-member price attached to them.

MSAWWA and MWEA suggest **you** reach out to the DEQ Operator Certification office and confirm that topics in the webinar you would like to take are appropriate for CECs for operators prior to the webinar. Contact Reta Therriault at (406) 444-3434 or rtherriault@mt.gov

Also, **you** must work directly with the DEQ Operator Certification program to complete the required documentation to get the CECs for the webinar.

The links to the webinar home pages for AWWA and WEF are below. Click on these links to check out up and coming webinars and to register.

AWWA - <https://www.awwa.org/Events-Education/Webinars> [awwa.org]

WEF - <https://wef.org/resources/online-education/> [wef.org]

Montana Rural Water Systems has trainings listed on their website <http://www.mrws.org>

Engineers and Consultants

Engineers and consultants should contact their respective licensing agencies for assistance in getting Professional Development Hours (PDHs) for the webinars.
