

# **Small Water System Operator Training: Achieve & Maintain Compliance with SDWA**

**Online Virtual Training  
November 16 & 17, 2022**

## **Meet Your Speakers:**

**Barb Coffman** is a member of the Montana Section of American Water Works Association and part-time Resource Specialist for Montana Rural Water Systems.

**Libby Murray-Henrikson**, is the Supervisor for Technical Services including Data, Operator Certification, and Administrative Support in the Public Water Supply Bureau of the Montana Department of Environmental Quality (MDEQ).

**Gregory Montgomery**, is the Lead in Schools Rule Manager in the Monitoring and Reporting Section of the Public Water Supply Bureau of the Montana Department of Environmental Quality (MDEQ).

**Josh Seekins**, is the Surface Water Treatment Rule Manager in the Monitoring and Reporting Section of the Public Water Supply Bureau of the Montana Department of Environmental Quality (MDEQ).

**Steve Shope** is a Technical Assistance Provider for the Midwest Assistance Program (MAP). Steve has experienced many aspects of public and environmental health including as a laboratory processes designer and manager, a regulatory official, and teaching nationally accredited classes in food borne (water) illness prevention.

**Presented by:**

**November 16 & 17, 2022**

**Online Virtual Training**

**CECs: Up to 0.600 Water**

SMALL SYSTEM OPERATOR TRAINING:  
**Achieve & Maintain  
 Compliance with  
 the SDWA**

**November 16 & 17, 2022    9:00 AM - 12:00 PM each day    Virtual Training - Using GoToTraining/Google Chrome**

**What:** Gain an understanding of the many Safe Drinking Water Act Regulations. Come away with knowledge on controlling lead in drinking water systems, and why manganese and PFAS are a contaminants of concern.

**Fee:** None

**Who Should Participate:** The target audiences for this course are operators, decision makers, engineers, and managers of small water and distribution systems in Montana including tribal and non-tribal small community water systems, non-transient non-community water systems, and transient non-community water systems.

**CECs:** Up to 0.600 Water

**Registration:** Must be done online prior to the training using the links below. You may have to copy and paste these links into your web browser. You should receive a confirmation email with information on how to join the training for each day.
