

Department of Environmental Quality is looking to hire a SRF Professional Engineer to join our team in the WPCSRF Section of the Water Quality Division. The SRF Professional Engineer is responsible for engineering review and analysis to determine whether public drinking water or wastewater facilities are constructed and operated in compliance with statutes, policies and regulations. The position works with facilities and provides engineering project management for a variety of technically complex projects. The position will complete assessments for water system planning, design, capacity, construction management, operations, maintenance and financing to determine if the facilities are providing optimal levels of performance. This position acts as engineering liaison for the Department to the public and municipalities on matters associated with water system engineering plan documents, design standards, processes, products, operations and policies.

At the Department of Environmental Quality, our ultimate goal is to champion a healthy environment for a thriving Montana. DEQ employees are the heart of our organization. We value the people and invest in their professional growth, promoting a culture of cross-agency collaboration as we find solutions to the environmental challenges we face. DEQ values – leadership, accountability, customer service, efficiency, excellence, and decision making – are fundamental to our work. Come be a part of the [Department of Environmental Quality!](#)

The SRF Professional Engineer position includes a career ladder for professional development and pay progression. This position may be eligible for occasional telework.

Minimum requirements include:

- Bachelor's degree in architecture, engineering, or a related field.
- Licensed professional engineer as required by 37-67-301, MCA, and the Board of Professional Engineers and Land Surveyors.
- Education and experience requirements as described by 37-67-323, MCA.
- Preferred related work experience in permitting, design, or review of engineering plans and specifications for land or site development, and construction management.

Alternative combinations of education and experience may be considered on a case-by-case basis.

In your cover letter, describe how your education, knowledge, and skills have prepared you for this position.

Applications, including supplemental materials such as cover letter or resume, must be submitted through the State of Montana Careers site (<https://statecareers.mt.gov/>) by the closing date of the announcement.
